Chloroprene's REACH Consortium Initiating by IISRP

Houston, TX USA 20 October 2008—

A new consortium focusing on the REACH registration for Chloroprene related substances has been initiated by International Institute of Synthetic Rubber Producers, Inc. (IISRP), announced by Institute's Managing Director & CEO, James L. McGraw.

Five companies, with the coordination made by IISRP, have signed the Memorandum of Understanding in October 2008 to form the consortium, pending on the Consortium Agreement which is undergoing final review. Its purpose is to combine the corresponding resources and efforts to prepare the consistent registration dossiers for chloroprene related substances before 1 December 2010.

This "pre-consortium" invites all interested parties – other EU manufacturers, non-EU manufacturers, importers, downstream users or other data holders – to join the consortium. For more details please contact info@iisrp.com

The IISRP is an international not-for-profit trade association with 50 corporate members, domiciled in 22 countries, who produce 90 percent of the world's supply of synthetic rubber. Incorporated in 1960 and headquartered in Houston, Texas, the Institute supports section offices in Milan and Tokyo.
